Greening Homes on the
Northern Neck since 2006

green neck consulting

can help you improve your quality of life by saving money and increasing the enjoyment of your home.

Discover the impact of your existing green practices.

Every Green Home Audit includes:

- In depth interview and home visit
- Written report proposing best practices and recommending home improvements to increase efficiency and comfort
- Follow up visit to present written report and help prioritizing steps to a greener lifestyle

Air Quality

Improve indoor air quality and ventilation

Water Conservation

Reduce water use by thousands of gallons a year and ease the strain on our diminishing aquifer

Energy Use

Eliminate phantom power drain and drastically decrease propane use

Lighting Efficiency

Use free daylighting and other methods to reduce kilowatt usage

Smart Landscaping

Plant natives to preserve our natural heritage, reduce water usage, and save time while attracting desirable wildlife

Call today to continue your path to a *naturally* better life.

Your Green Home Audit will begin paying for itself from day one.
